

ABS Enclosures

- Compact Versatile Enclosures
- ABS Construction
- Custom Configurations
- Splice or Patch options
- Accessories supplied as required

Mainframe Communications Ltd. have produced a range of versatile enclosures for applications where space is a premium or a standard patchpanel is inappropriate.

Made of lightweight ABS these enclosures can range from being a simple inline splice enclosure through to breakout patch boxes, with or without bulkhead adaptors.

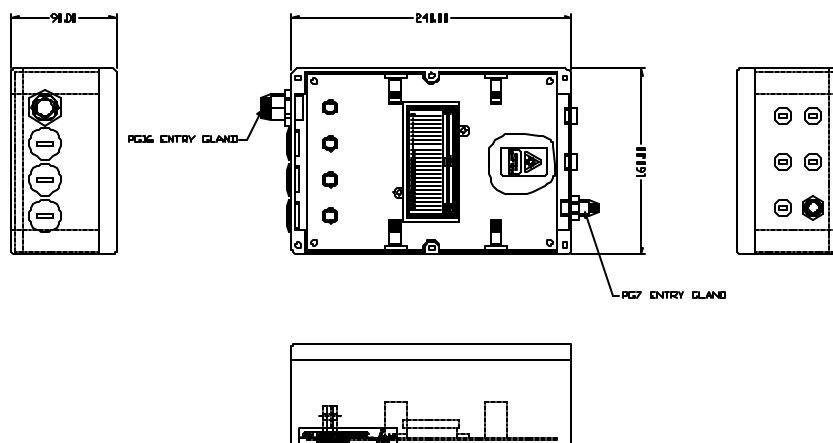

The units range in a variety of sizes to suit the incoming cable size and number of outlet cables: 12 way, 24 way and 48 way splice capacity.

All of the boxes feature a screw down cover sealed to IP65. This allows installation access to be straight forward and secure.

The enclosures can be provided with a range of accessories including: splice support sleeves, pigtails and if required installation service.
